

Overview Of The BestAI Challenge-Based Resources (WebQuests)

BestAI Empowerment Toolkit

Empowering Social Entrepreneurs with AI

Do you want to shape the future with purpose and innovation?

The BestAI Empowerment Toolkit is here to support a new generation of changemakers —people just like you—who want to use Artificial Intelligence (AI) to solve real social and environmental problems. Whether you're a young innovator with a fresh idea or a social entrepreneur scaling your impact, this toolkit helps you turn ambition into action—with practical tools, real-world case studies, and interactive learning experiences grounded in AI.

What Is the BestAI Empowerment Toolkit?

The Toolkit is an innovative, challenge-based learning resource designed to build practical skills in using AI to:

- Launch or scale social ventures
- Solve real-world challenges in ethical, sustainable ways
- Learn by doing—not just reading

At its core are 20 WebQuests, which are like guided missions, each tackling a specific issue that blends social impact with digital innovation.

What Is a WebQuest?

A WebQuest is a question-based learning experience where the information you work with comes from the web.

You'll explore, evaluate, and use online tools (like AI platforms) to investigate problems, develop solutions, and build something meaningful.

Unlike traditional lessons, WebQuests focus on real-world application, creativity, and critical thinking. You don't just learn about entrepreneurship—you become one.

Who Is the Toolkit For?

The Toolkit is designed to support:

- Aspiring social entrepreneurs
- Vocational learners and students with bold ideas
- Educators and trainers looking to teach innovation through action
- Incubators, NGOs, and policy makers working to build stronger, greener economies

Whether you're exploring your first idea or already running a venture, the Toolkit meets you where you are—and helps you go further.

What Will You Learn?

Each WebQuest belongs to one of seven key learning areas that mirror the journey of a social entrepreneur:

1. Introduction to Social Entrepreneurship & AI for Social Good

What does it mean to lead with purpose? Learn the basics of social enterprise and how AI can be a force for good.

2. Trustworthy AI: Ethical & Sustainable Prompting

Not all AI is created equal. Discover how to use AI in ways that are transparent, ethical, and aligned with your mission.

3. Defining Your Mission: Research & Idea Viability with AI

Use AI to identify social issues that matter, validate your ideas, and create projects that are both meaningful and viable.

4. AI-Driven Business Models for Social Enterprises

Design innovative, sustainable business models with the help of AI-driven insights and strategy templates.

5. Creating AI-Powered Social Services and Products

Learn to develop services and solutions that respond to social needs—using AI to design, test, and deliver.

6. Measuring Your Impact with AI

Impact matters. Use AI to track, measure, and communicate the difference your project is making.

7. Engaging Your Community: AI for Marketing & Communication

Learn to use AI for storytelling, outreach, social media planning, and building a loyal, supportive community.

Each WebQuest is hands-on and solution-focused.

This isn't about memorizing facts. It's about building something real, with AI as your co-pilot.

Co-Created with Real-World Stakeholders

To make sure this Toolkit is relevant, inclusive, and useful, we've asked for input from real social entrepreneurs and support networks across Europe.

Each partner organisation is engaging at least two key stakeholders, such as:

- Educators and VET learners
- Social enterprise leaders
- NGOs and incubators
- Business chambers and accelerators
- Policy influencers and youth groups
- Journalists and media

Their feedback ensures that every learning journey is rooted in the needs of real communities.

Where Will You Find It?

All content will be freely accessible via the upcoming BestAI Digital Incubator:

An interactive, online platform where you can:

- Navigate WebQuests at your own pace
- Connect with other learners and social entrepreneurs
- Access tools and inspiration 24/7

Whether you're working solo or in a classroom, the Incubator will help you go from idea to action—supported by an AI-powered, human-centered learning environment.

Why It Matters

In a world facing urgent challenges AI can be part of the solution.

But only if it's in the hands of those who care.

The BestAI Empowerment Toolkit helps you:

- Make smarter, ethical decisions
- Build projects that matter
- Use AI for impact, not just efficiency

Meet the Partners

This initiative is powered by a team of organisations working across innovation, training, and social impact:

Tech Innovation (*Spain*)

VET Expertise (*Italy*)

Social Impact & Education (*Bulgaria*)

Communication & Storytelling (*Estonia*)

Digital Transformation & EdTech (*Cyprus*)
